

Sector SPDRs

This PDF file contains charts for the 11 sector SPDRs. Each shows the Keltner Channels, RSI(10) and StochRSI. Note that all 11 sectors broke below their lower Keltner Channel and are in long-term downtrends. Not one sector has moved back above the upper Keltner Channel. XLV, XLK and XLP are the closest because they had the strongest bounces over the last 15 days. XLF, XLI, XLC and XLE had the weakest bounces because they did not exceed their 50% retracement lines, which are shown on all charts. RSI(10) is just above 60 for XLK, XLV, XLY, XLP, XLRE and XLB.
